

Professional Service: Expert Witness

Construction Disputes
Construction Failures
Injury on Site
Falls at Work
Code Violations

I Have been involved as an architect and builder for over thirty five years. These years were spent as an active architect builder and planner. For the past twenty years a portion of my practice of architecture has been representing various clients in planning, construction and architectural litigation. Working under the pseudonym of Betoken 1 we offer lawyers our services as an expert witnesses. This service averages about fifteen cases a year.

Most services begin with a call from either the plaintiff's or defendant's lawyer. A telephone review of the case with the attorney involved will determine a fixed fee for the initial investigation, code review, taking on site pictures and finally writing my opinion on the case. Separate hourly rates are defined for my deposition and or court appearances.

Most case we are involved in are for the plaintiff . I average roughly seventy five percent success rate.

Please feel free to contact me personally for any estimate or free appraisal of your case. Contact can be made through any of the following medias.
